

ORT is the largest educational network in Israel. Established in 1949, it has trained over 500,000 graduates, most of them in science and technology. The [ORT Israel](#) network provides educational programmes for over 100,000 students in 160 schools and colleges with 8,000 educators and administrative employees.

Science and technology have always been at the core of ORT Israel's mission. ORT Israel programmes are fostering and encouraging young students to develop their abilities and careers in High-Tech and advanced scientific studies.

ORT Israel Moshinsky Centre for R&D is constantly involved in researching and developing educational materials, teaching methods, ICT platforms and e-learning. The centre is implementing innovative, pedagogical and organisational processes in schools.
