

The screenshot shows the top of a blog post on the '2020 Science' website. The header includes the site name and tagline 'A clear perspective on emerging science and technology'. Below the header are navigation links: HOME, ABOUT, RECOMMENDED, TOP 40 POSTS, and a SUBSCRIBE button. The main article title is 'Risk, uncertainty and sustainable innovation. Feedback sought on symposium blurb' by Andrew Maynard, dated October 21, 2010. The article text begins with 'Despite the risk of receiving absolutely no comments (please don't let me down), I thought I'd try something new and ask for some feedback on the background blurb for a meeting I've been working on.' To the right of the text is a search bar for '2020 SCIENCE', a 'Subscribe via Email' form, and a 'RECOMMENDED POSTS' section with several article titles. A small portrait of Andrew Maynard is visible on the right side of the page.

In the 2020 Science blog by Andrew Maynard you will find posts on emerging science and technology, with a great deal of them focusing on nanotechnology, but also covering other areas such as synthetic biology or environment.

Andrew Maynard is a physicist and Director of the [Risk Science Center](#) at the [University of Michigan School of Public Health](#). He's also been chief science advisor to the [Project on Emerging Technologies](#).
